

**Cox® Technic** is a chiropractic spinal manipulation treatment protocol. The **Cox® Technic System of Spinal Pain Management** incorporates the biomechanical and clinical skills based on research-tested and evidence-based protocols to relieve spine pain related to disc and non-disc causes. Cox® Technic is not simply flexing or distracting a table in hopes of relieving pain. Cox® Technic is a system of biomechanical knowledge, examination, diagnosis, treatment & patient education using published research to control spine pain non-surgically.

The **demand for effective, non-surgical care** of spine pain has never been greater. **Spinal stenosis** and **disc herniation** are an epidemic in the U.S. and the world. It absorbs over 90% of the cost in treating back pain. Back surgery success is 50/50 which frustrates both patient and insurance payer. We can also help post-surgical patients, but to keep them from surgery is an even better goal. To offer non-drug, effective treatment for simpler back pain may allow patients a higher quality of life with the option of controlling their spine pain so it doesn't control them. **Your expertise with the Cox® Technic System is needed more than ever in chiropractic to answer this epidemic.** Will you participate?

**COX® TECHNIC CERTIFICATION COURSES** are designed to share the Cox® Technic System of Spinal Pain Management. Certification is available after attending Parts I & II and passing the Certification Examination at Part II. Maintenance of active certification status requires attending one course (Part I, II or III) once every two years to keep abreast of the latest research (from the likes of Loyola Stritch School of Medicine, Palmer, National, Hines VA, etcl.) regarding Cox® protocols and effects on the spine.

- **Part I** focuses on the research-documented academic and practical foundations of Cox® Technic Flexion-Distraction and Decompression for lumbar spine. Via Powerpoint® presentations, videotaped clinical patient cases and discussions, and instructor-lead hands-on training, the attending physician is introduced to Cox® Technic, particularly for non-disc related conditions. 12 hours
  - TBA (maybe Vancouver or Portland OR)
  - April, July, October—Fort Wayne, IN—See next section
- **Parts I & II combined**—Part I content is described above while the Part II content focuses on the evidence-based clinical protocols of Cox® Technic for disc related conditions via academic presentations sharing published literature on the biomechanical behavior of the disc as well as the clinical outcomes of Cox® Technic on the disc. Hands-on instruction focuses on the proper application of forces and protocols for radicular and non-radicular spine pain. 30 hours **Part II starts at 1pm Friday; Cervical Session** is Friday morning 9a-Noon. (OPTIONS: Part I/12 hours only **OR** Part II/18 hours only **OR** Part II with Cervical 21 hours only) The optional lumbar spine certification exam is offered.
  - April 14-17 2016—Fort Wayne, IN
  - July 21-24, 2016—Fort Wayne, IN
  - October 20-23, 2016—Fort Wayne, IN
- **Part III** uniquely engages the attending physician with practical guidelines for applying Cox® Technic and its research in the clinical setting and interacting with the local healthcare and patient community. Presentations focus on sharing the latest research findings on Cox® Technic (Health Resources & Services Administration, FCER, journal published), highlighting certified doctors' clinical outcomes via their case presentations and patient clinical rounds as well as their unique practice situations (hospitals, medical groups, multidisciplinary groups, etc.), and setting goals for the future of the technique. **This most exciting weekend is appropriate for anyone to attend as it is a showcase for success of Cox® Technic in the field.**
  - January 16-17, 2016—Tampa, FL
  - February 6 &/or 7, 2016—Maui, HI
  - June 25-26, 2016—Boston, MA
- **NEW! CERVICAL SPINE CERTIFICATION WEEKEND**— This is the *inaugural* weekend devoted to cervical spine research support, examination, diagnosis, and treatment filled with hands-on demonstration and practice as well as patient case reports to see how the protocols fit into clinical practice. 12 hours plus the (optional) cervical spine certification exam.
  - September 17-18, 2016—Chicago, IL (Ohare)

*"Nice combination of research and daily practice info. Great way to treat disc disorders. Gentle technique. Well researched. Lots of education opportunities. Really enjoyed the thoroughness of the course and knowledge base/experiences of the instructor." - Part I attendee, 1/12*

**SPECIAL PRESENTATIONS** are arranged with other sponsors for a Cox® Technic presentation. Our instructors discuss the on-going research updates and academic evidence-based detail for the Cox® Technic system of protocols. **These do not qualify for recertification.**

- TBA

**WORKSHOPS** are arranged with certified Cox Technic physicians in their offices. 4 hours of hands-on! CE is available for some.

- Chicago | Fort Wayne IN | Vancouver Canada | Halifax | Mayetta NJ | Herndon VA | Wildomar CA | Minster OH

**WEBINARS—ON DEMAND AND LIVE**—are topic-specific to biomechanics, examination, diagnosis, treatment and/or condition.

- Lumbar Disc Herniation, Cervical Disc Herniation, Spondylolisthesis, Pelvic Pain, Spinal Cysts, Scoliosis, Stenosis, etc.

*syllabus, schedule & hotel details—online registration—phone-in registration*
